

# Spay/USA and you can help end the cat/dog overpopulation and save lives!

Spay/USA is a national network of veterinarians and programs, offering low-cost spay/neuter services, in an effort to end pet overpopulation. Our goal is to make affordable spay/neuter services available to those who would not otherwise spay or neuter their pets.

## Joining the Spay/USA network benefits everyone!

Joining the network is free	Promotes existing spay/neuter programs through referrals
Generates new clients for veterinarians	Provides materials to help inform the public of the existence local programs
Veterinarians determine their own low-cost fees	Promotes spay/neuter practices as a way of ending pet overpopulation, thus saving lives of cats and dogs
Helps people who help strays	Helps people of limited means care for their pet(s) responsibly

**How does the Spay/USA work?** Spay/USA currently has over 1,000 affordable spay/neuter programs and 8,000 top-notch veterinarians participating in our network nation-wide. A central office has a toll-free number (1-800-248-SPAY) which links service providers with those in need.

**Veterinarians** determine their own special low-cost spay/neuter fees. However, we do ask that the fees be truly affordable as this program is intended for persons of limited means. Vets are paid by the client at the time of service.

**Individuals** seeking assistance with spay/neuter can contact our toll free number to receive a referral to a participating vet in their area and a SPAY/USA certificate to redeem a low-cost spay/neuter price.

**If there are no participating programs or veterinarians in your area** - you may obtain information on **how to start your own program or receive a sign-up kit to take to a local vet**, by calling our 800 number.

**Call SPAY/USA If You Need Help Or Want To Help!**
